ABSTRACT

The Office of Research, Evaluation, and Assessment of the New York City Public Schools evaluates the Chapter 1 Math Skills program annually. Objectives, which were set by the Division of High Schools, are that at least 50 percent of full-year program participants will demonstrate a normal curve equivalent (NCE) gain of at least 1 unit as measured by a comparison of pretest and posttest scores on the Mathematics Achievement Test or the Regents' Competency Test. It is hoped that at least 60 percent of participants in Model B or Model D mathematics classes will pass the course. Student outcomes, which include percentages improving and passing the course, are presented for the superintendencies of Manhattan, Brooklyn, the Bronx, and Queens, as well as the superintendencies labeled "Basis" and "Alternative." Outcomes are given for sites by status, by superintendency, and by superintendency with the class model designated. Results are presented in 442 pages of tables. (SLD)

Chapter 1 Math Skills Program

The Office of Research, Evaluation, and Assessment (OREA) annually evaluates the Chapter 1 Math Skills Program. A separate report presents program outcomes for students receiving services through P.C.E.N and A.I.D.P. funding.

The Division of High Schools devised the evaluation objectives for the Math Skills Program to avoid additional testing for Chapter 1 students. Tests already in place in the High School Testing Program are used as evaluation instruments. Although the objectives refer to participants who took part in the program for the full year, OREA collects data on students participating for one term and applies the same objectives to these students. The objectives are as follows:

A. At the end of the program year, at least 50 percent of full-year program participants will evidence an N.C.E. gain of at least one unit as measured by a comparison between their pretest scores (Spring 1990) and their posttest scores (Spring 1991) on the Mathematics Achievement Test (MAT) or the Regents Competency Test (R.C.T.). Substantial progress will consist of 25 percent of students gaining one or more units.*

B. At the end of each term, at least 60 percent of the participants in Model B and Model D Mathematics classes will pass the course. Substantial progress will consist of at least 50 percent of participants passing the course.

* Ninth grade students take the Metroplitan Achievement Test in mathematics as a pretest and the R.C.T. as a posttest. R.C.T. scores can be converted to MAT math N.C.E.'s. therfore, scores for ninth grade students are reported in N.C.E.'s units. The R.C.T. score of tenth, eleventh, and twelfth grade students are reported as raw scores as no norms exist to convert R.C.T.'S into standard scores.

Please note that these objectives are more stringent than previous years objectives in that they call for an improvement of one full N.C.E. unit. As a result, the percent of students meeting the evaluation objective in particular schools may be lower than in previous years.

The following is an explanation/definition of the categories listed in the report. OREA hopes that by giving you these definitions, the data might assist your staff in planning your program to meet the needs of your students.

"STATUS" - Status refers to whether students took part in the program for half year or full year.

"GRADE" - Participants are categorized by grade.

"TOTAL NUMBER OF STUDENTS" - This refers to the total number of students who received services according to data retrieval forms.

"# WITH VALID ATTENDANCE." - The number of students that had data and were in attendance for at least 10 days and/or mo more than the number of instructional days in the term.

"MEAN PERCENT OF ATTENDANCE."-The average attendance rate of all participants (days present) over the number of instructional days. For example, if the number of days present is 75 and the total number of instructional days is 100, the mean percentage of attendance = 75 percent.

"# WITH VALID R.C.T. SCORE" - The total number of students in the program who had <u>both</u> pretest and posttest Math R.C.T. scores.

"MEAN PRETEST SCORE" - The average R.C.T. score students received on the math pretest.

"MEAN POSTTEST SCORE"-The average R.C.T. score students received on the math posttest.

"% WHO IMPROVED IN MATH" - The percentage of students whose posttest score was at least one N.C.E. unit higher than their pretest score.

"# WITH VALID COURSE INFORMATION" - The number of students for whom there is a final grade.

"% WHO PASSED MATH COURSE" - The percent of students who passed their mathematics course.
